connecting audio

Archwave at IBC in Amsterdam
New series with AES-67 modules and CopperLan

Swiss audio technology company Archwave will be present at the IBC show in Amsterdam from 12-16. September, 2014. At the booth a series of AES-67 audio network solutions, including a range of hardware modules will be exhibited, as well as a new Command & Control solution for audio networks based on the exclusively licensed CopperLan technology.

Archwave is a technology partner of different pro audio manufacturers and especially renowned for its innovative USB audio-streaming technologies. The Swiss audio specialist displays at IBC a new series of AES-67 solutions characterized by their straightforward integration and user-friendly control interface. The system offers a variety of hardware modules and an intuitive network management system (Command & Control), built around the exclusive CopperLan technology.

Archwave is a technology leader worldwide and in recent years it has invested in the RAVENNA and AES67 audio network technologies. Archwave is recognized now as a global leader bridging networks, USB and recording for audio applications.

Currently, Archwave has the exclusive license to the CopperLan technology. "Simply put, it's 'MIDI 3.0 on steroids.' It opens up innovative ways to connect and control musical instruments, audio equipment and networks," states Archwave's CEO, Arie van den Broek.

Besides the possibilities that CopperLan-for-Audio and its network management provide, the IBC Archwave stand will also feature four compact AES67/Ravenna modules to marvel at:

- uNET STANDARD with up to 32 audio channels, standard 40-pin Molex connector
- uNET COMPACT with up to 16 audio channels, Mini-PCI Express connector
- uNET MINI with 4 audio channels, Mini-PCI Express connector
- uNET CENTRE with up to 64 x 64 audio channels and GbE Interface
